## SLEEPING BEAUTY

After a hundred years of deep sleep finally the saving prince arrives.

If he at all is allowed to kiss awake without entry permit, face mask and protective gloves? Probably not as one also has to observe the 1 m distance rule, and also the prince is not related yet to the lazy sleeper, hence there is an absolute contact ban.

And further, if one imagined how much dust has gathered on the princess' face during one hundred years, then even the biggest dirty slob does not feel like kissing anymore.

In addition, disinfectants are so expensive that the poor prince can not even afford it, and to brush her face with toilet paper is illusory, too, as Germany has bought up worldwide all the paper. Big bums have its needs indeed.

To approach a sleeping stranger with the intent of kissing is considered as sexual coercion and will be severely punished.

Poor prince. What can he do? Wait until the country has calmed down again. At that stage one hundred years more or less does not matter that much anymore.
